Winemaking Notes –

- Fermentation – When the fruit is brought in it is gently destemmed into small open top fermenters. The berries are then allowed to cold soak for 2-5 days before being inoculated with yeast. Once the fermentation begins the cap is gently punched down by hand or the juice is “pumped over” using gravity. The fermentation lasts between 5 to 15 days. After the free run is drained down into barrels the must is then gently pressed directly into separate barrels.

- Alcohol – 16%

Aged 23 months in a mix of new and neutral French, American, and Hungarian oak

Revealing even juicier, more abundant fruit than the 2004, the 2005 Syrah does not yet reveal much complexity, but its soft, round, opulent, voluptuously-textured style is seductive. Tel. and Fax (805) 226-0828
